# Else International School App

## Project Overview

The prime objective of "Else International School app is to create full-fledged android application which is going to help students for solving their basic requirements. It can also be used for teachers also. It is an effort to reduced time and money for solving basic purposes like paper work, posters for advertisement, school diaries for every student and so on.

## Problem and Solution Statement

Else School App manages all activities like notice board, attendance, upcoming events, results, school facilities and daily diary for students as well as for faculties. App also includes enquiry and contact us if any parent has some query. Students must need to login with their respective IDs to see private events. The purpose of this project is to help parents to be in touch with school activities, upcoming school events and also eliminating the paperwork.

## Benchmark (How this solution is better?)

This school app provides enquiry section, results and every member of this school has its own personal diary so that any record or data one would want to store, he can do it. This school app cannot provide facility of online fees payment. If any other app is providing good quality service than ours then that app is better than us but we try our best to give fruitful output for user and for school also.

## Implementation strategy

**Tools and languages used (For development):**

- Android Programming
- Java for logic purpose
- Android version 3.0 and higher version
- Standard Development Kit(SDK)
- JDK

We have assumed that user has the basic knowledge of operating an android phone.

**Permissions:**

- INTERNET
- ACCESS_NETWORK_STATE

- CAMERA
- LOCATION

**Project Flow:**

```
                    ◇ Home ◇
                        |
   ┌────┬────┬────┬────┬──┴─┬────┬────┬────┬────┬────┐
[School][Gallery][Enquiry][Downloads][Events][Daily Diary][Results][Attendance][Notice][About Us]
Facilities
```
